### Biography

A professional photographer and the founder of *ernestshoots photography*, Ernest attempts to tell a story with every photo he takes by fusing the elements found in the composition of each photo. He constantly challenges himself to seek and go where no one has gone – searching for different perspectives – and capture what no one has on this little red dot we call home. When not on assignments, Ernest can be found wandering the paths less travelled, literally and figuratively, searching for different perspectives.
